

UNIVERSITY OF TASMANIA EXPLORING DOMESTIC GREEN-BOND DEAL

Monday, 21 February 2022

The University of Tasmania (Aa2) announced plans for an Australian dollar denominated fixed-rate green bond on 21 February. The transaction is expected to be offered with a 10- or 12-year tenor, but the issuer says it is open to taking indications of interest at a longer maturity date. Commonwealth Bank of Australia and National Australia Bank are mandated to arrange a series of investor calls on 2 March.

Proceeds of the bond would be used to support the financing of assets and projects that are aligned to the ICMA Green Bond Principles 2021, in accordance with the issuer's green bond framework.
